

**Lake Lansing Special Assessment District**  
**Management Plan for Lake Lansing and its Watershed**  
**Goals and Objectives – 2018 - 2027 Update**

*Goal: Maintain and improve the environmental quality of Lake Lansing and its watershed.*

1. Continue water quality testing to warn of any changes in water quality.
2. Prevent nutrients and pollutants from entering the lake.
3. Maintain catch basins on the drains around the lake to trap harmful substances that may otherwise run into the lake.
4. Manage nuisance aquatic plants by methods that support all recreational activities, including boating, swimming, and fishing, while emphasizing prevention of the introduction of new species.
5. Manage waterfowl as a contributory factor in lake contamination.
6. Support enforcement of and/or develop zoning codes, i.e. footprints, permeable surface and drainage regulations.
7. Preserve and improve wetlands in the Lake Lansing watershed as storm water filters, particularly the southern shoreline.
8. Encourage the maintenance of roads, buildings and grounds in the watershed in good, lake-friendly condition.
9. Support the maintenance of the lake shoreline for a natural appearance wherever possible.
10. Support the proper storage or use of dangerous materials in the Lake Lansing community. Dangerous materials include large amounts of flammable liquids, explosives, dangerous construction materials or equipment and cast-off medical equipment and appliances.
11. Discourage the release of harmful wastes into the Lake Lansing community.

*Goal: Maintain and improve recreational opportunities and public safety in Lake Lansing and its watershed.*

1. Support a variety of summer and winter recreational activities on and around Lake Lansing, i.e., swimming, sailing, waterskiing, kayaking, canoeing, sailboarding, water boarding, slow cruising, fishing, jet skis and wave runners, ice fishing, walking, cross country skiing, ice boating, ice boarding, snowmobiling and other appropriate activities.
