

Lake Lansing Watershed
Special Assessment District Advisory Committee
Scheduled Treatment Notice
June 03, 2026 Weather Permitting

HERBICIDE TREATMENT: Lake Lansing is scheduled to be chemically treated on Wednesday, June 03, 2026. The actual application date and time is subject to change because it is dependent on several factors including weather.

Please see attached Posting Map and Posting Sign for details and restrictions. This is the same sign that will be posted along the shoreline on the day of application.

This treatment different than “normal”, because of the additional growth probably because of last fall’s lower water and therefore more sunshine. No matter what the cause, there is a recommendation for a different treatment this year and therefore some additional restrictions.

The additional restrictions only involve using lake water for watering ornamentals. The chemical applicator, PLM, wrote:

“Attached is the posting sign for next week. Progressive AE has been recommending the use of Renovate lately which requires some drastic posting restrictions for irrigation. There are no restrictions for established lawns, but we are required to post 120 days for ornamentals. I’m not sure if people use the lake for irrigation. If not, it is no issue, but we get more calls from residents with the use of this product than any other. Typically, we will recommend a two-week irrigation pause. If more detail is needed, we can pull samples and have them analyzed post treatment for irrigation restrictions. There is a fee for the sampling and testing. We can talk about that if needed. Let me know if you have any other questions.”

The lake will be surveyed a few weeks after treatment to determine the effectiveness of the treatment and to assess the need for harvesting and/or more treatment. Remember, Milfoil is best not harvested until after treatment has succeeded but before it falls.

This notice and alert through Facebook and Next Door have been produced for the Lake Lansing Watershed Special Assessment District Advisory Committee by Meridian Township. This notice as well as future notices can be found on the Meridian Township [website](#).

Thank you,

Lake Lansing Special Assessment District
Advisory Committee

PLM Lake & Land Management Corp. Certified Applicator(s) Conducting Treatment: Hannah Cornell, Jeff Fischer

PLM Lake & Land Management Corp. Certified Applicators: Adam Jones, Andrew Weinberg, Andy Tomaszewski, Ashlee Haviland, BreAnne Grabill, Cameron Wright, Casey Shoaff, Colton Risner, Cory Robinett, Daulton Higgins, Dustin Grabill, Dylan Broekstra, Elijah Quinn, Eric Reed, Ethan Ford, Garrett Johnson, Griffin McClain, Hailey Birchmeier, Hannah Cornell, Holden Elsner, Holly Bengtson, Jaimee Desjardins, Jake Hunt, James Scherer, Jason Broekstra, Jeff Fischer, Jeff Tolan, Keith terHorst, Kyle Heath, Landon Conroy, Lucas Slagel, Michael Pichla, Nathaniel Draper, Noah Hanson, Pierce Johnson, Preston Adgate, Preston Wallace, Raquelle Shaw, Reese Ransom, Samuel Bailey, Shelby Robinett, Steve Hanson, William Conklin, William Ducham

The chemicals used for Aquatic Nuisance Control are registered by the U.S. Environmental Protection Agency and the Michigan Department of Agriculture. The potential for damage to fish and other non-target organisms is minimal provided that the product is used as directed on the product label and the permit. To minimize the possible effects on health and the environment, the treated water is restricted for the above purposes.

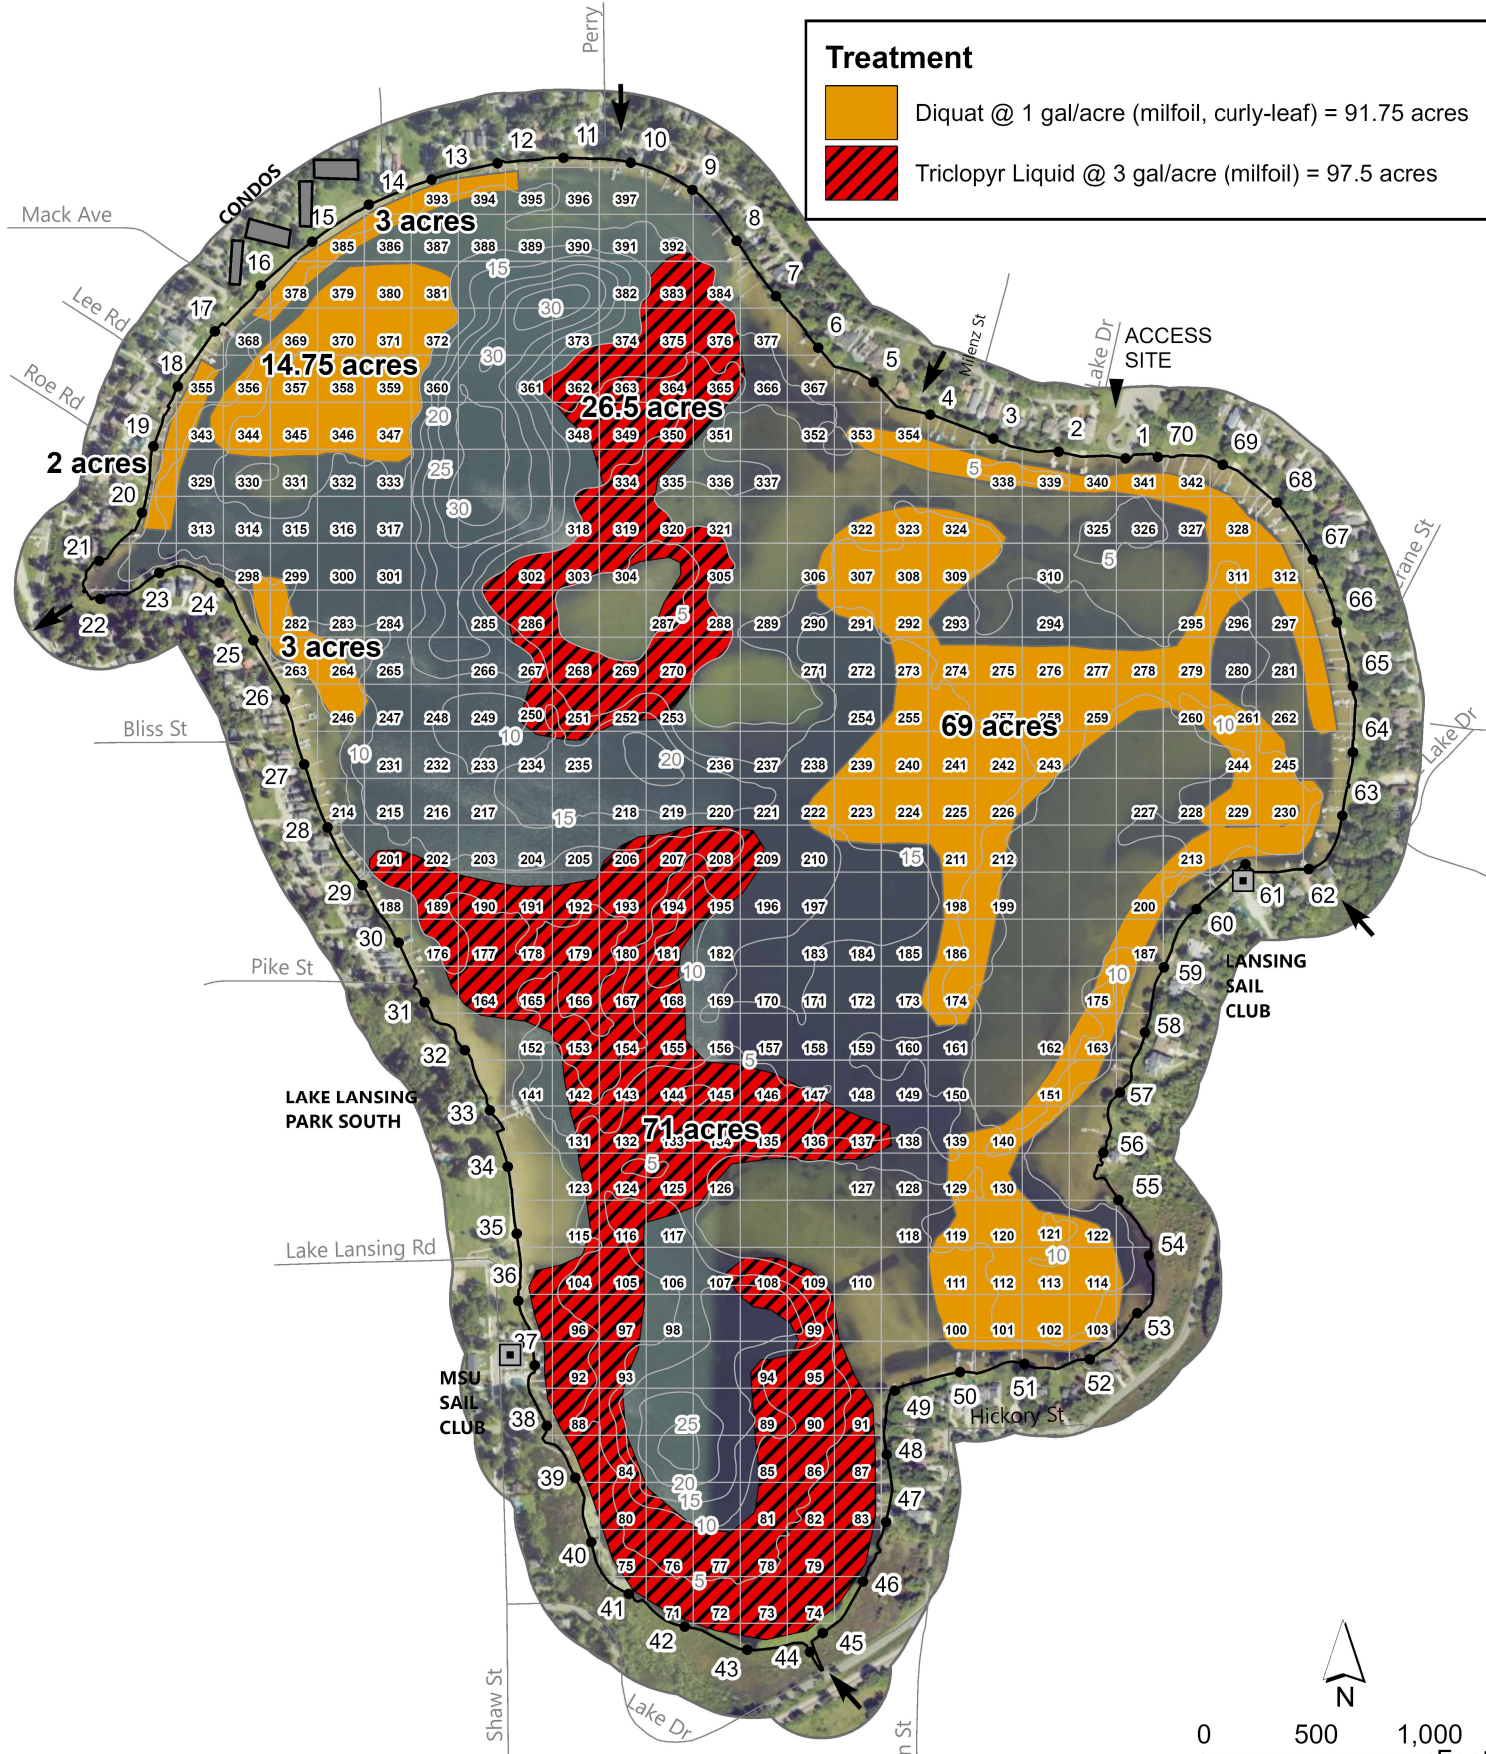

Method of Application: Chemical application will be made via boat, back pack, and/or land vehicle applying liquid surface products by surface spray and/or injection. Granular product application will be surface broadcast.

□ = 1 ACRE GRID

LAKE LANSING INGHAM COUNTY, MICHIGAN TREATMENT MAP SURVEY DATE: MAY 15, 2026

Treatment

-  Diquat @ 1 gal/acre (milfoil, curly-leaf) = 91.75 acres
-  Triclopyr Liquid @ 3 gal/acre (milfoil) = 97.5 acres

LAKE AREA = 456 ACRES

The applicator shall make adjustments, if needed, to comply with EGLE permit requirements.
